

Quality Policy

Pacira is the leader in non-opioid pain management. Our mission is to transform the lives of patients by providing access to non-opioid pain management solutions.

Quality supports the corporate mission and has ensured an overlapping Quality Policy to build and foster the quality culture we desire. This is our Quality Policy, upheld by Senior Leadership and practiced by every employee of Pacira BioSciences, Inc.

Pacira is committed to providing high quality pharmaceuticals throughout the products full life cycle to address worldwide patients' needs. The Pacira Quality Management System (QMS) provides guidance, structure and programs necessary to support the production of quality pharmaceuticals in compliance with applicable global regulatory requirements. The QMS leverages data and self-assessments to enhance our risk-based approach and make continuous improvements. It is incumbent upon all Pacira employees to act in a compliant and ethical way while actively participating in the implementation of the QMS. Pacira also takes responsibility to assure that business partners are operating to a quality standard consistent with the Pacira QMS. Pacira commits to developing and monitoring Quality metrics with routine management reviews to ensure adherence to this policy.
