

For people seeking treatment for chronic pain due to knee osteoarthritis

You can help shape the future of knee osteoarthritis pain management

IGOR (Innovations in Genicular Outcomes Registry) was created to improve pain management through learnings from people impacted by osteoarthritis.

Ask your health care provider if you are eligible for the IGOR registry

This registry collects your experiences with knee osteoarthritis treatment

The goal of IGOR is to gather a large collection of information from many different people

This registry, nicknamed IGOR, will provide a way to learn from patients receiving pain management for knee osteoarthritis and after knee replacement surgery. You will be asked to answer questions starting before treatment and continuing for 18 months after treatment. The questions will ask about treatments such as physical therapy and prescribed medications, but also about how much pain you are in, any side effects that might occur, and how treatment affects day-to-day life. These questions will be answered and data collected using a smart device such as a cell phone.

The following is a list of requirements to be a candidate for IGOR:

- Your doctor plans on treating your pain due to knee osteoarthritis with one of the following:
 - Oral medications
 - Knee injections
 - Nerve blocking procedures
 - Knee arthroplasty (total knee arthroplasty [TKA], partial knee replacement, revision, or bilateral TKA)
- You have access to a smartphone, smart device, or computer with internet access
- You are willing and able to answer the daily/weekly/monthly questions provided

If you are unsure whether your treatment qualifies, don't hesitate to ask your health care provider if you are eligible for IGOR

Your participation is voluntary, but invaluable

Without patients like you, knee osteoarthritis pain management would not be where it is today. By taking part in this registry, you are helping pave the way for better pain management. Not only are you helping others who struggle with this chronic disease, but you're also improving the future of your pain management with this condition.

Your responses to these questions help us understand how treatments can be safer and better. All questions in this registry lead back to how treatments can improve everyone's health and quality of life.

Frequently asked questions

Q Who is in charge of this registry?

A The registry is funded by Pacira BioSciences, Inc. in collaboration with experts in the treatment of pain due to knee osteoarthritis.

Q What is being done with my personal information?

A Your privacy is of the utmost importance and is protected by the law. Your personal information will not be shared beyond your care team and will only be looked at as a collective of all patients enrolled.

Q What happens if I miss a daily or weekly assignment?

A If you miss one of the assignments, that's ok. You will be asked to complete it if the questions are still available to you, or you will just resume at the time of your next check-in.

Q What if I can't continue with the registry after I enroll?

A You can stop the registry at any time throughout the process. Your withdrawal from the registry will not affect your treatment in any way.
